SEALANTS THAT **PREVENT PLAQUE** WITH ANTIMICROBIAL TECHNOLOGY

**SELEN BIO**
DENTAL

A MONUMENTAL BREAKTHROUGH IN DENTAL CARE
SelenBio Dental, a division of SelenBio, Inc., provides a line of dental products with Seldox® technology. This remarkable technology inhibits bacterial growth on treated dental surfaces and has been clinically tested and FDA approved.

WHAT IS SELDOX® ANTIMICROBIAL TECHNOLOGY?
Seldox® technology is a selenium-based patented formulation of organic compounds proven to inhibit bacterial growth. Selenium is a naturally occurring, non-toxic, non-leaching trace mineral that is essential to overall health.

IN CLINICAL TRIALS, OUR PIT AND FISSURE SEALANT, WITH SELDOX® TECHNOLOGY, EXHIBITED HIGHER RETENTION AND PREVENTION OF PLAQUE ON TREATED AREAS* THAN LEADING COMPETITIVE BRANDS.

Treated surfaces protect against plaque-causing bacteria that contribute to demineralization and tooth decay during orthodontic and dental treatments.

1. Seldox® creates a blanket of protection.
2. When bacteria attempt to colonize on the Seldox® surface, bacterial growth and plaque are significantly reduced.
3. Surfaces treated with Seldox® remain cleaner due to less bacterial growth and plaque accumulation on the enamel surface.

* Clinical study by Dr. Bennett Amaechi, UTHSCSA
LABORATORY TESTING | WITHOUT AND WITH SELDOX®

WHO BENEFITS FROM SELDOX® TECHNOLOGY?

Seldeo® technology revolutionizes oral hygiene in the dental industry.

DENTAL PROFESSIONALS

- Dentists who value their patients’ health will benefit by providing them with the highest quality care.
- SelenBio Dental products are easily adopted into your practice and do not require any special training or change of procedures.

PATIENTS

- Patients will have a better experience and will receive outstanding, long-term results.

YOUR PRACTICE

- Your practice will benefit from patient satisfaction and loyalty.
- Your patients will spread the word to others.
